Javeler

Marine Services LLC

Javeler Marine Services LLC is a specialized dredging service company that has been moving the earth for over 40 years. With in-house engineering and fabrication capability, Javeler is able to modify submersible dredge pumps and provide custom design solutions to suit your dredging needs. Javeler strives to offer safe, reasonably priced, fuel efficient, and environmentally responsible service in subsea excavation, dredging, mitigation, and coastal restoration.

24 HOUR SUPPORT

Javeler is committed to providing exceptional customer service. Our experienced and knowledgeable team gladly accepts the opportunity to assist you 24 hours a day. Our centrally located New Iberia, LA operations headquarters enables quick response to the entire Gulf Coast.

FIELD PERSONNEL

Our team of qualified field technicians provides expertise in equipment layout, dredging support, equipment maintenance/repair, and daily reporting to ensure optimal productivity and, most importantly, a safe operating environment. Every field technician is TWIC, SafeGulf, HUET, CPR and Rigging certified.

EXPERIENCE

Javeler offers more than just excavation equipment. After 40 years, Javeler remains an innovative leader in applied and responsive dredging solutions. Pioneering deep-hole excavation in the Gulf of Mexico, Javeler remains committed to expanding and perfecting our tooling capabilities, techniques, and global presence.
